OBJECTIVE

AI/ML researcher with hands-on experience benchmarking deep learning architectures and turning complex model outputs into stakeholder-facing insights (ISRO internship). Building SQL and Power BI skills alongside strong Python and data fundamentals.

EDUCATION

Central University of South Bihar, Gaya **2024–2026**

Master of Science in Artificial Intelligence (CGPA: 8.15)

Ram Krishna Dwarika College (Patliputra University), Patna **2020–2023**

Bachelor of Computer Applications (Percentage: 73.25%)

SKILLS

Programming Languages: Python, R, SQL

AI/ML: Machine Learning, Deep Learning, Natural Language Processing (NLP)

Libraries/Frameworks: Pandas, Scikit-learn, TensorFlow, PyTorch, NetworkX, Apache Spark

Visualization & BI: Data Visualization, Power BI, Excel, Canva, Powerpoint

Tools: Jupyter Notebook, Google Colab, Linux, Git

Relevant Coursework: AI, ML, ANN, BDA, SE, DAA, WSN, and Social Network Analytics

EXPERIENCE

Space Application Centre, ISRO

Ahmedabad, India

AI/ML Research Intern

Jan 2026 - June 2026

- Benchmarked five deep learning architectures (including CNN-LSTM, GCN-LSTM, and Attention-based ConvLSTM) for forecasting two ocean parameters independently over the Northern Indian Ocean using 5+ years of satellite data, finding that Attention-based ConvLSTM achieved the highest accuracy for one and GCN-LSTM for other one.
- Implemented scalable PyTorch/TensorFlow data pipelines to process 5+ years of high-dimensional spatio-temporal satellite data across multiple ocean parameters for time-series forecasting.

PROJECTS

Real-time Healthcare Insights and Predictive Analysis of Cardiovascular Disease

- Forecasted cardiovascular disease death rates through 2030 for 3,142 U.S. counties using Meta Prophet, achieving under 5% forecast error across both age groups.
- Built an end-to-end pipeline covering data cleaning, model validation, and risk analysis, and visualized results using interactive U.S. maps to highlight high-risk counties. [GitHub](#)

Customer Lifetime Value (CLV) Analysis by Marketing Channel

- Analyzed customer acquisition data across marketing channels using Python and Pandas, calculating ROI and CLV to evaluate channel performance beyond just cost and conversion rate.
- Finding that email marketing delivered the highest ROI at the lowest cost, while social media generated the highest and most consistent customer lifetime value. [GitHub](#)

WORKSHOPS & CERTIFICATIONS

- One Million Prompters – Prompt Engineering (Dubai Future Foundation)
- AI for Cybersecurity, Bootcamp at IIT Patna

EXTRACURRICULAR ACTIVITIES

- **Institution's Innovation Council, CUSB**— Co-Coordinator, Innovation Committee (Sept 25–Jan 26); Member (Oct 2024–Aug 2025). Managed visual branding, promotional materials, and event layouts for Open House 25 and the Ideation Showcase.
- **Software Freedom Day**— Organized in 2024 and 2025 with 100+ participants, promoting Open Source Software and FOSS awareness.
